EDUCATION

University of Central Florida | Expected Graduation: 2028 | Future B.S. in Computer Science

- **Relevant Coursework:** Discrete Structures, Computer Organization, Security in Computing, Computer Science I, Introduction to C Programming

PROFESSIONAL EXPERIENCE

Mosaic Automation | Software Engineering Intern | Jun 2025 – Jan 2026

- Translated legacy trading strategies from EasyLanguage to Pine Script
- Created and maintained a codebase for modernizing financial models

Computer Science Volunteering Organization | Co-founder | Feb 2024 – Apr 2025

- Taught classes of 10+ computer literacy and programming fundamentals
- Worked with team of 6 volunteers to make lesson plans and pass down the club to future members

PROJECTS

Financial Machine Learning Toolkit | Personal Project | 2022 – Present

- Research project evaluating feasibility of automating financial investments with ML
- Built a modular framework for training models using GPU-acceleration
- Implemented strategy simulation to compare model performances

Portfolio Website | Feb 2026 – Present

- Full stack website built with Figma using React, Node, and Tailwind
- Deployed using Docker, Cloudflare, and Nginx on a Linux home server, secured with Let's Encrypt
- Updated version of previous Flask website which was made from scratch with HTML and CSS

Training Job Manager | Jul 2025

- Developed a full-stack app to manage ML training jobs with user authentication
- Backend built with FastAPI, hosted on AWS ECS using SQS and Modal
- Automated production deployments using Docker and CI/CD

Podium | GemiKnights hackathon hosted by Knight Hacks @UCF | 2025

- Built a mock interview web app with a team of four
- Developed backend to process video, analyze posture and tone, and generate feedback
- Built full stack using JavaScript, TypeScript, and the Gemini API on Node JS

SKILLS

- **Languages:** Python, C, C++, Java, Rust, Lua, JavaScript
- **Tools and Frameworks:** PyTorch, NumPy, Flask, TensorFlow, SSH, Linux, Docker, PostgreSQL, Kubernetes, AWS, Git, Cloudflare
